Enovation Solutions

Enovation Solutions has been providing managed services and project delivery consultancy for over 10 years. Our initial focus was the provision of managed services to the financial sector through the application of our expertise in **project management**, **quality assurance** and **bespoke application development**. Recognising the potential of the growing market for open source software, Enovation established a team to provide enterprise implementation and support capability around a range of proven open source products. This offering leveraged our proven project delivery and management capability in these new technology areas.

In 2012 Enovation attained certification to the international standard **ISO 9001:2008 Quality Management**. This was achieved for the core services that Enovation offers in hosting, project management and delivery of open source solutions.

SOLUTIONS

LEARNING PORTALS

Enovation have developed full portal solutions for our clients with comprehensive web site functionality, learning management and ePortfolios.

One such example is the GAA Training Portal:

- Delivered using Drupal, Moodle, Mahara
- Single Sign-on
- Third party system integration

## THINKING OF MOVING TO MOODLE?

Enovation are one of the foremost experts in helping organisations move to Moodle from other learning platforms.

- Pragmatic approach
- Change management expertise
- Flexible pricing models
- Fully remote service

FEDERATED MOODLE

Allows organisations (training companies, umbrella groups etc) create and manage multiple Moodle instances.

- Create, update, delete Moodle sites easily
- Centralised reporting
- Content sharing

DOCUMENT MANAGEMENT
& COLLABORATION PORTALS

OPEN SOURCE DOCUMENT MANAGEMENT

Enterprise document and records management solutions (ECM) are often perceived to be expensive to implement with high annual licensing fees.

Alfresco is a proven open source Enterprise Document and Records Management System with a large and growing international user base. It is distributed on a subscription basis.
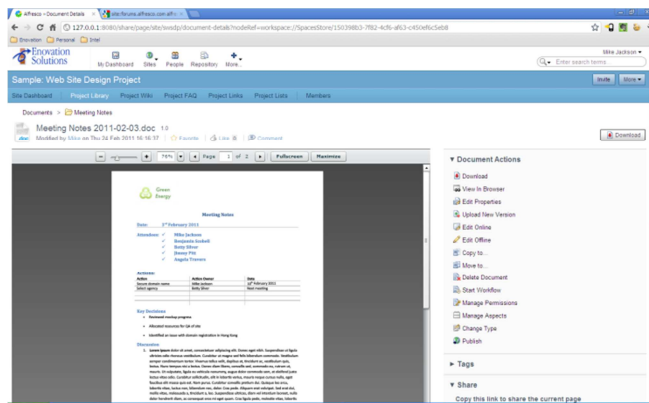

We implement Alfresco solutions (managed services include hosting, customisation, training and support) for clients as diverse as **Three Ireland**, **Royal College of Surgeons, Meath County Council** and **Trinity College Dublin** among others.

For several clients it has been implemented as an external portal so that dispersed project teams from different organisations can collaborate on content using web 2.0 social functionality combined with workflow and a powerful document library.

SOLUTION FEATURES

- Managed, versioned documentation
- Rich browser interface and / or shared network drive view
- Workflow
- Records management
- Standards compliant (CMIS)
- Metadata and tagging
- Full text search
- In-browser preview
- Create permission controlled shares

USE CASES

- Enterprise document management
- Records management
- Project collaboration
  ‣ Cross / intra-University
  ‣ Construction projects
  ‣ Any project with several external stakeholders
